

PRIMAVERA

KEY FEATURES: PRIMAVERA CONTRACT MANAGEMENT, BUSINESS INTELLIGENCE PUBLISHER EDITION

KEY FEATURES IN PRODUCT

- Oracle Business Intelligence Reports
- Oracle's User Productivity Kit (UPK)
- Content Repository
- Version Control
- LDAP

KEY BENEFITS

- Comprehensive Change Management
- Visibility into Contractor Performance
- Timely Payment Negotiations
- Document Management
- Submittal Management
- Team Collaboration

Oracle's Primavera Contract Management, Business Intelligence Publisher Edition enables companies to deliver more projects on schedule and within scope, while reducing overall project costs. The key features included in this release are listed below.

Reports

Oracle's Business Intelligence Publisher replaces InfoMaker as the report writer for Primavera Contract Management. It offers a robust solution that is shared with the Primavera family of products. The standard reports and forms available in prior versions of Contract Management are provided in Primavera Contract Management, Business Intelligence Publisher Edition.

Change Management

Comprehensive, multi phase change management is a key feature to Primavera Contract Management. Track and control changes from inception to resolution keeping complete history.

Payments

Primavera Contract Management provides the ability to cue, track and automate performance based progress payments to subcontractors to ensure unnecessary delays are avoided. Primavera Contract Management also reduces liability of firms by allowing for improved turnaround time between project contributors.

Content Repository

Primavera Contract Management, Business Intelligence Publisher Edition offers a secure option for storing attachments with its ability to utilize a content repository –SharePoint or Oracle UCM. This provides a structured and secure environment to store records associated with projects. The content repository is also used to store document versions.

Document Management

Accountability and collaboration are key aspects of Primavera Contract Management. Documents are tracked and stored along with attachments in a single location providing a complete picture of the project. The version control feature provides the ability to save iterations of each document to provide history.

Oracle User Productivity Kit (UPK)

UPK is enabled throughout Primavera Contract Management, Business Intelligence Publisher Edition, providing another option to provide end users with information on process and application usage.

Technology Enhancements

- Oracle Business Intelligence Publisher, where users can create and edit reports, forms, and letter templates. Standard reports and forms are available in Oracle BI Publisher.

- Linux and 64-bit operating systems are supported. Microsoft Word is no longer required for letters or letter templates. Letter templates are now created through Oracle BI Publisher, and letters can be edited with any text editor that supports .rtf files.
- The Oracle User Productivity Kit, which enables users to create customized Contract Management tutorials.
- Contract Management was redesigned so that its user interface corresponds with the look and feel of Oracle's Primavera P6 Enterprise Project Portfolio Management user interface.
- Web Service enabled
